Design Choices

Wolverine offers the industry's widest selection of siding, soffit, trim and accessories, in a broad range of profiles, colors and finishes. This gives you choices from a complete exterior design system. You can mix and match from many options to achieve the style and look you want, whether your home is remodeled, restored or brand new.

Number One in Quality

Thousands of architects, builders, remodelers and homeowners put their trust in Wolverine. In fact, Wolverine consistently ranks *number one* in

quality among architects, builders and remodelers in numerous leading trade publications.

Full-panel Restoration Shapes 7" Shakes in Savannah Wicker are used on this Pennsylvania home. Window trim is a combination of Vinyl Carpentry™ J-channels, wide lineals and aluminum; four-piece corner systems are used.

Restoration Shapes™

Re-Creating the Historic Appearance of Rough-Hewn Cedar Shingles

The realistic low-gloss rough cedar grain finish of the 7" Shakes in Savannah Wicker is nicely offset by window trim in Snow and dark green shutters.

NEW Double 9" Rough-Split Shakes bring a fresh, rustic split-cedar dimension for full wall coverage or use as a decorative element.

Vinyl Carpentry™ Decorative Trim

Complete the Distinctive Look with Beautiful Finishing Touches

Crown Molding

This architectural feature is found on many historic homes. Crown molding is a popular and distinguishing decorative feature.

SuperCorners™

Extra-wide, extra-long (20-ft.) traditional, fluted and beaded corners have rigid foam backing. The patented beaded corner offers a colorful snap-in insert.

Beaded Triple 2" Soffit

This soffit is ideal for use as a vertical siding or to provide vertical design elements such as wainscoting.

Patented Corner Block and Rosette

This final finishing touch for wide window and door corners has historic precedence. These are available in a wide range of colors.

Accent with Restoration Shapes™ Half-Rounds on gables, dormers and end walls for the authentic look of shaped, rough-hewn cedar shingles.

In early architecture, cedar logs were split into shingles for full walls and decorative applications. Some were shaped to create a “fishscale” look and applied to end walls and gables to face the weather. Wolverine Restoration Shapes brings you three versatile styles of rough cedar-grain shingles, all with the low-maintenance advantages of vinyl. All Restoration Shapes panels are designed to coordinate with Vinyl Carpentry™ Decorative Trim corners, window and door lineals and accessories that all accurately reflect the clean, classic architectural looks of fine homes.

Real wood shakes can warp and split.

D9" Rough-Split Shakes

Restoration Shapes™ 7" Shakes

Rough-Sawn Cedar Shingles

Here is the traditional look of Colonial homes clad with cedar shakes.

The 7" Shakes were innovative as the industry's first 10-foot long shingle panel, ideal for full-wall coverage or for use as an ornamental component.

The Shakes are manufactured with Wolverine's exclusive, TrueTexture™ finish for maximum authentic appearance.

Restoration Shapes are backed by a no-nonsense lifetime limited warranty that's even transferable should you sell your home.

◀ *The Restoration Shapes 7" Shakes are Natural Clay. Outside cornerpost, J-channel, Ironmax Double 5" Soffit and Fascia are all in Snow.*

The 7" Shakes in Soft Almond and the contrasting traditional corner provide a natural counterpoint for this predominantly stone home and its copper accents. ▶

New Restoration Shapes™ Double 9" Rough-Split Shakes

Hand-Split Cedar Shakes

The Double 9" Rough-Split Shakes are a 57" long panel, versatile for use as the basis for complete walls or as a decorative element for gables and end walls. Look at the random patterns and deep grains; this is a truly unique panel, incorporating the Wolverine TrueTexture™ finish.

Restoration Shapes™ Double 9" Rough-Split Shakes

For a warm, rustic appeal in full-wall coverage, the owners of this home chose Double 9" Rough-Split Shakes in Savannah Wicker with matching mitered cornerposts. ▶

Restoration Shapes™ Half-Rounds

Shaped Cedar Shingles

Deep-grain Half-Rounds are a Double 6-1/4" exposure panel that is 32" long, replicating shingles that have been shaped into rounds to provide the historic "fishscale" appearance for gables, dormers and end walls.

◀ *Restoration Shapes Half-Rounds in Soft Almond are used on the upper gable, which coordinates with their use in Savannah Wicker over the porch.*

*Window shapes surrounded with Vinyl ▶
Carpentry™ Decorative Trim in Snow
